EDUCATION & CERTIFICATION

Western University

Bachelor of Science in Computer Science

Sept. 2022 – April 2026

London, ON

- **HTB Certified Web Exploitation Specialist (CWES)**, July 2026
- Two-time Dean's Honour List recipient

EXPERIENCE

Security Research

April 2026 – Present

Independent Security Researcher | Burp Suite, Caido, Python, Bugcrowd

- Ranked in Keeper Security's Top 15 Hall of Fame and earned **\$12,000 in bounties** across resolved findings
- Uncovered a **Keeper device-approval bypass** allowing unapproved devices to reach authentication; fixed within 24 hours of validation, with public credit in Keeper's release notes
- Demonstrated **account takeover** on NASA's GLOBE platform through stored XSS; validated as High (P2)
- Demonstrated **cross-tenant access to network-security allow/deny lists** through a High-severity authorization bypass in Google Cloud
- Demonstrated **database-account takeover** via SQL injection in Keeper Gateway's password-rotation plugins from a low-privilege record editor; validated as High (P2), fixed and rewarded
- Reported 30+ vulnerabilities across 18 programs (Bugcrowd, HackerOne, Intigriti, and Google VRP)

Kaimz Inc.

Jan. 2025 – April 2025

Cybersecurity Intern | Wazuh SIEM, Log Analysis, Incident Response

Waterloo, ON

- Reduced manual alert triage time by approximately 35% through severity-based scoring and routing of Wazuh alerts
- Analysed security logs, built detection rules, and mapped coverage to MITRE ATT&CK to identify monitoring gaps

Hatchloom Inc.

Jan. 2026 – April 2026

Software Developer Intern | Node.js, PostgreSQL, AWS EC2

- Delivered a production-ready learning and community platform across desktop, tablet, and mobile
- Built the Node.js and PostgreSQL backend with REST APIs for user management and content delivery
- Implemented JWT authentication, role-based access controls, and automated CI/CD deployments to AWS EC2

OPEN SOURCE

OWASP ZAP

Jan. 2026 – Present

Contributor | Java, JUnit 5, Gradle

Open-Source Web Security Scanner

- Merged three contributions adding example alerts for LDAP injection, username enumeration, and SQLite injection scan rules
- Added JUnit tests for alert content and references, and extracted reusable alert builders to remove duplicated code

PROJECTS – VIEW A MORE COMPLETE LIST OF MY PROJECTS

AI-Assisted Security Research Workflow | Claude Code, Python, MCP

April 2026 – Present

- Developed an AI-assisted workflow that organizes security findings in a **structured evidence ledger** and uses the recorded evidence to draft bug-bounty reports
- Built an **eight-phase workflow** around a custom pentesting methodology, creating skills, subagents, and playbooks and configuring MCP servers; used it to help identify all bug-bounty findings

Social Engineering AI | Independent Research

April 2026

- Investigated how **fabricated security-lab framing** changed an AI assistant's responses, using fictional documents in chat sessions to examine the influence of conversational context on safeguards
- Published a **single-session case study** tracing the assistant's behavior through conversation evidence and discussing context verification, with explicit limits on generalizing the results

TECHNICAL SKILLS

Security Tools: Burp Suite, Caido, OWASP ZAP, Nmap, Wireshark, ffuf, nuclei, sqlmap

Vulnerability Research: Web, API, GraphQL, authentication, access control, injection, RCE, SSRF, XXE, business logic, source-code review, OWASP Top 10, CWE, CVSS 3.1

AI & LLM Security: Claude Code, Codex, MCP, prompt injection, OWASP Top 10 for LLM Applications

Development: Python, Bash, SQL, JavaScript, PHP, Java, C/C++, Node.js, PostgreSQL, Git, Linux
